Jet Stream

Enjoy seamless access to your favorite movies, TV shows, music, and more on the big screen, anytime at home.

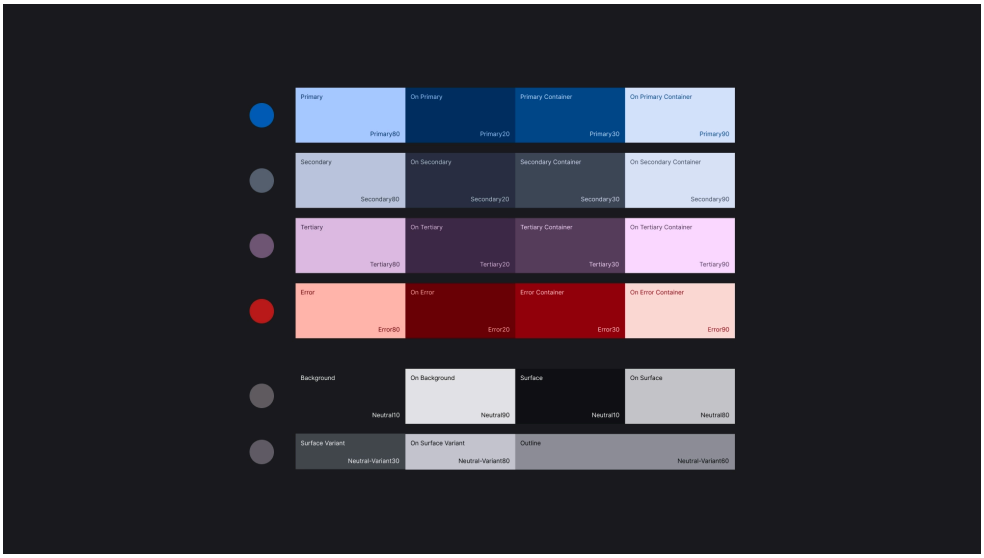
Resources

Type	Link	Status
Design	Design source (Figma) (https://goo.gle/jet-stream-figma)	Available
	Inter (Google Fonts) (https://goo.gle/jet-stream-fonts)	Available
Implementation	Jetpack Compose (Github) (https://goo.gle/jet-stream-github)	Available

Theme

Color theme

A color theme is generated using the Material Design 3 theme generator.

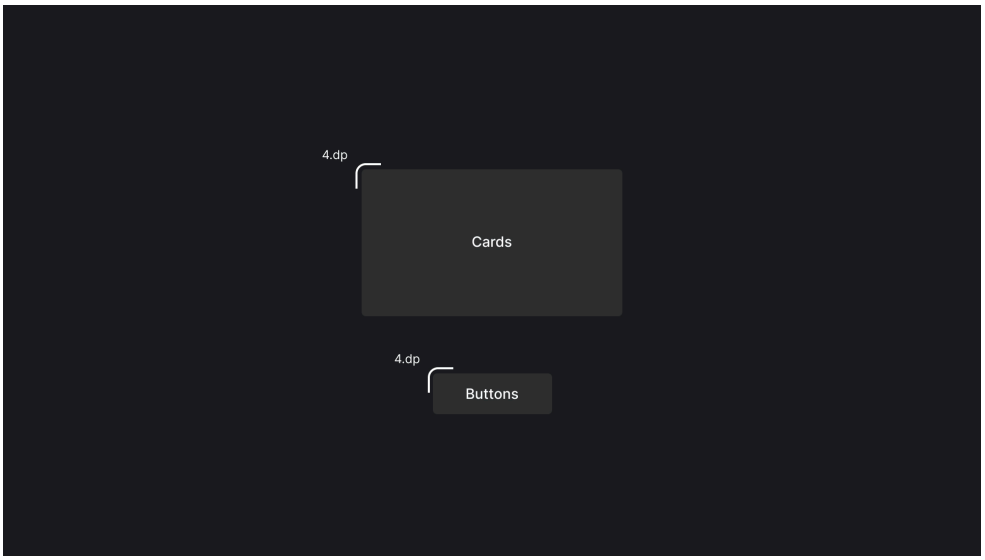


Typography

JetStream's type scale uses the Inter typeface to create a simple and clear look for TV screens.

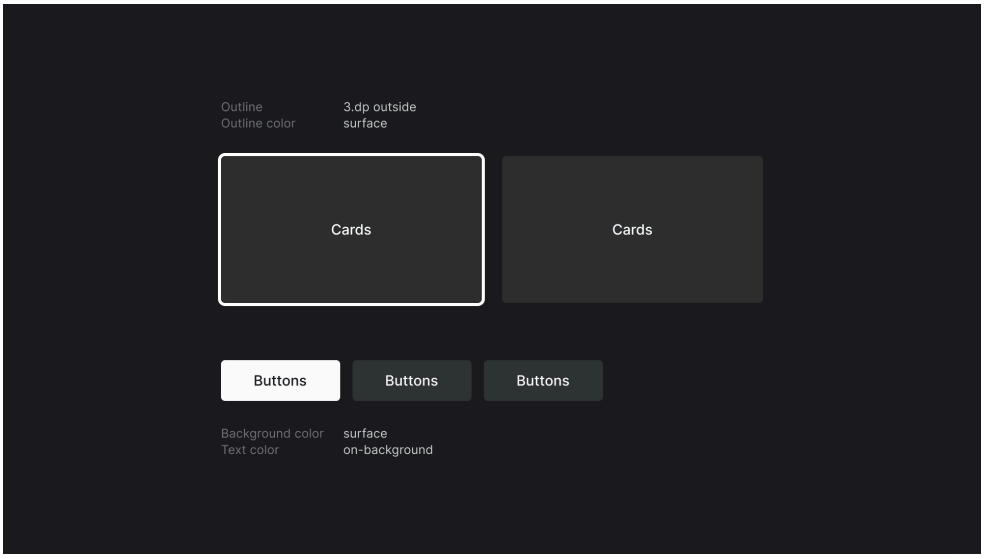
Shape

A subtle radius is applied to the cards and buttons to create friendly and approachable edges.



Focus

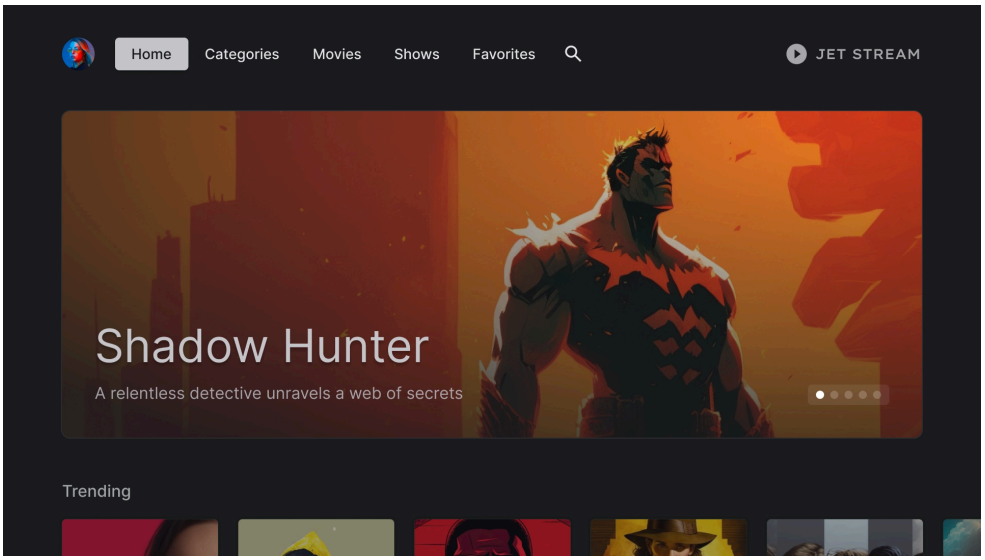
A 3dp outline with an outline color is used in JetStream.



Home

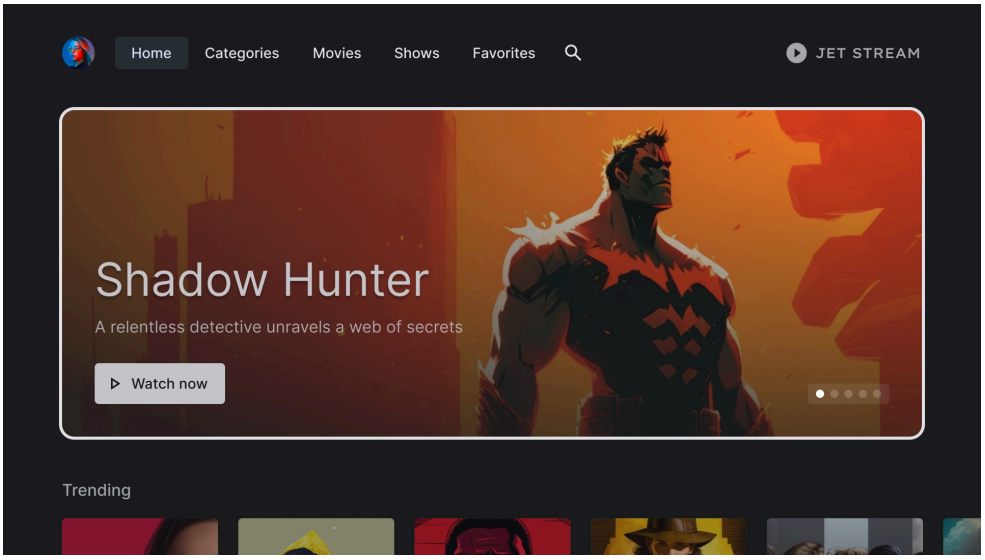
Home

Landing page of JetStream app.



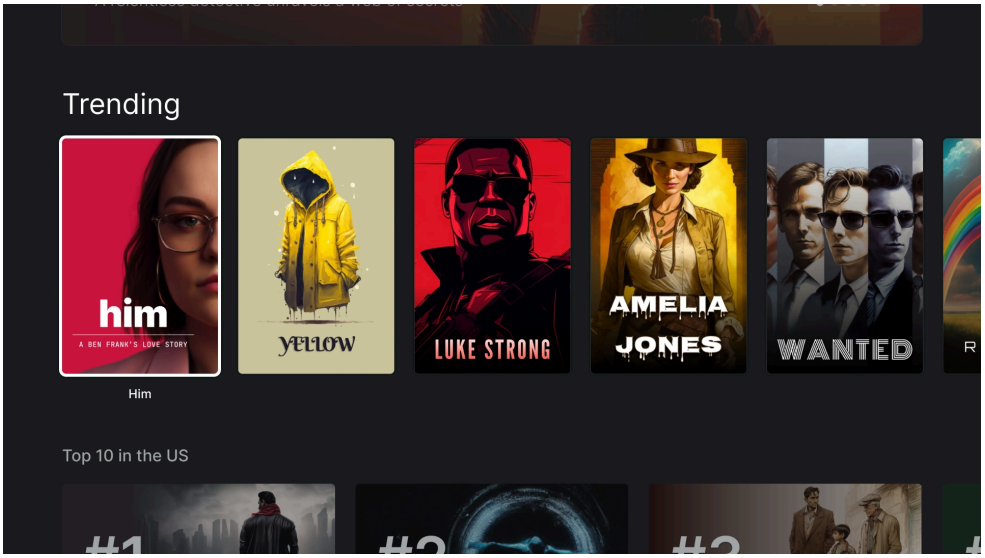
Featured carousel

A carousel with a card-style layout.



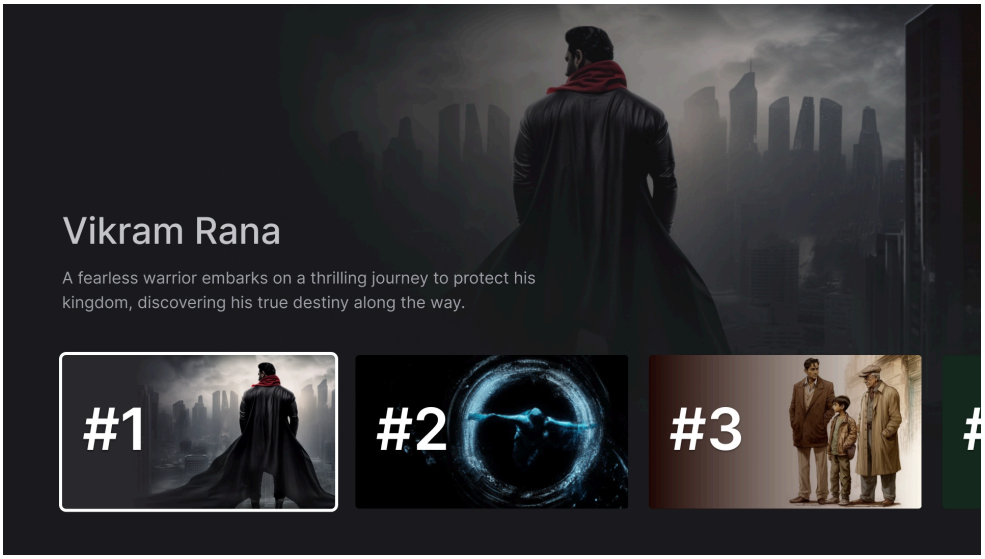
Content row

JetStream utilizes a standard card style with a 2:3 aspect ratio in a 5-column layout.



Immersive list

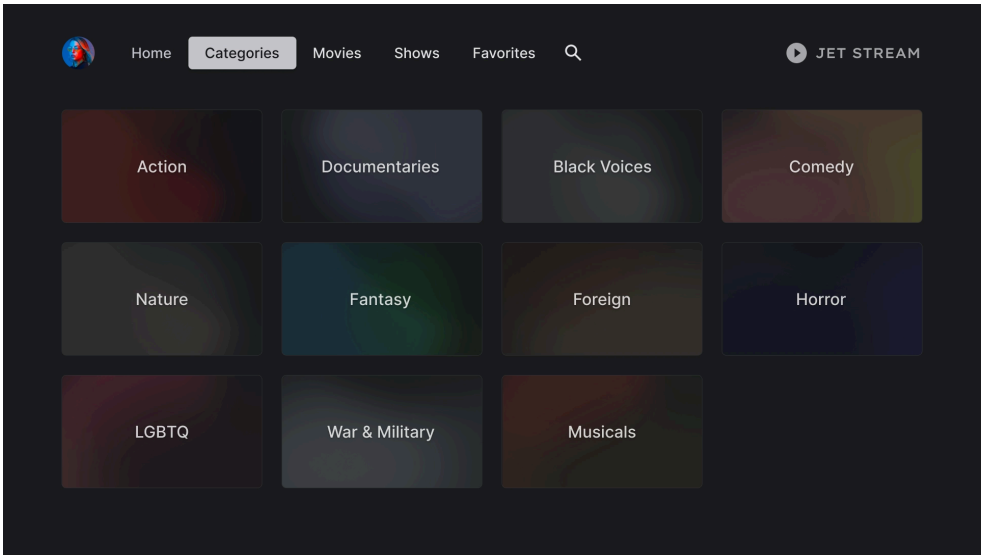
Highlight special content in the app using the Immersive list component, such as top 10 trending movies.



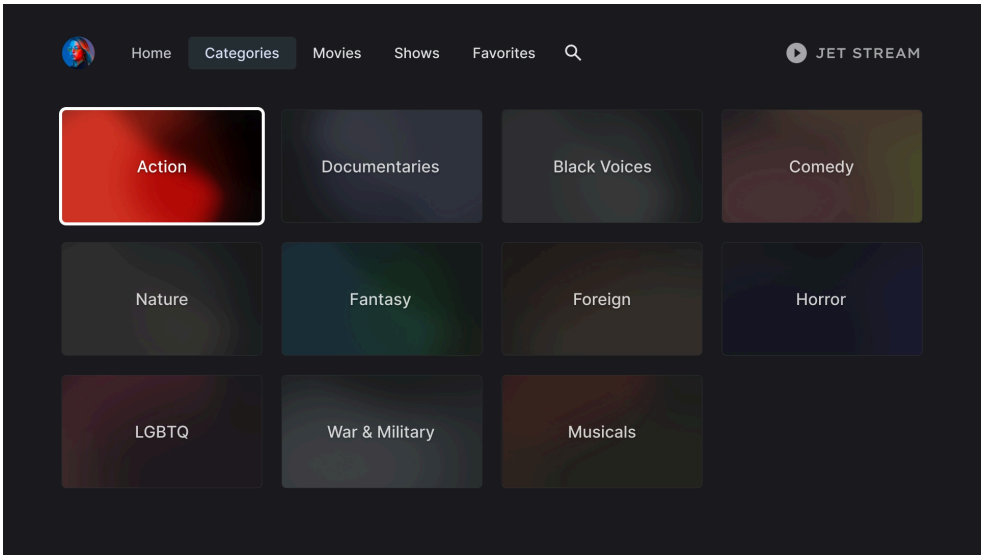
Categories

Categories

The Categories page displays genres in a grid format for easy navigation and access.

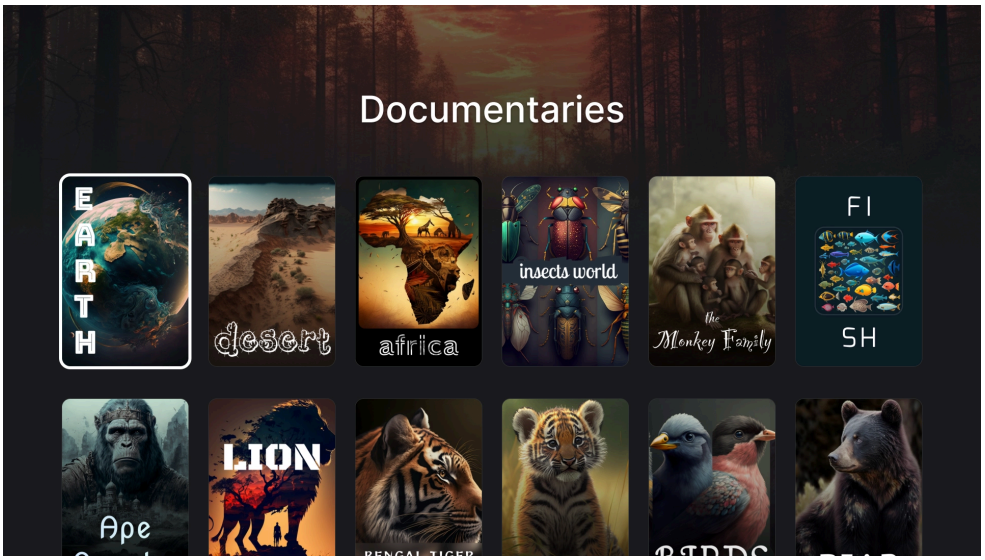


Category cards



Category details

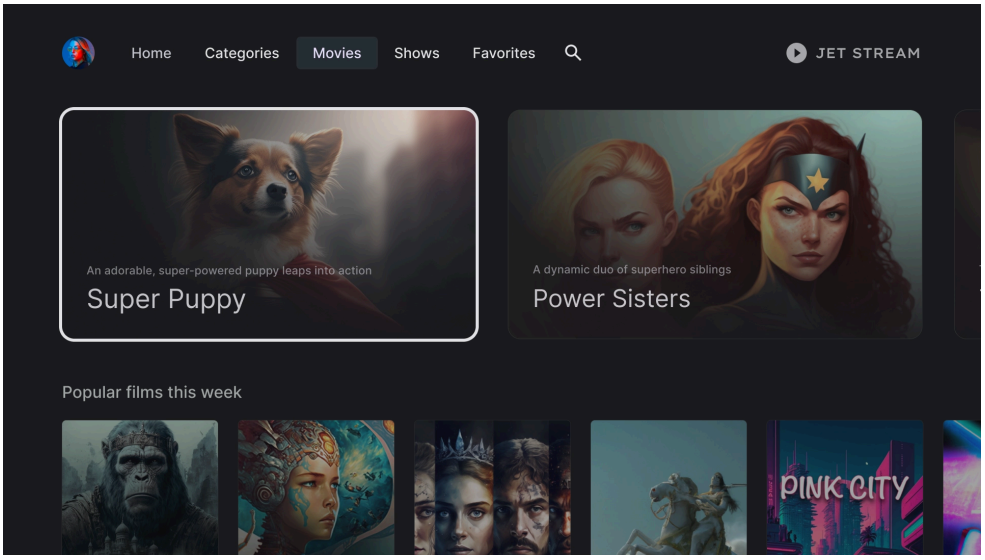
A 2:3 card grid with a header is used to create the Category details page.



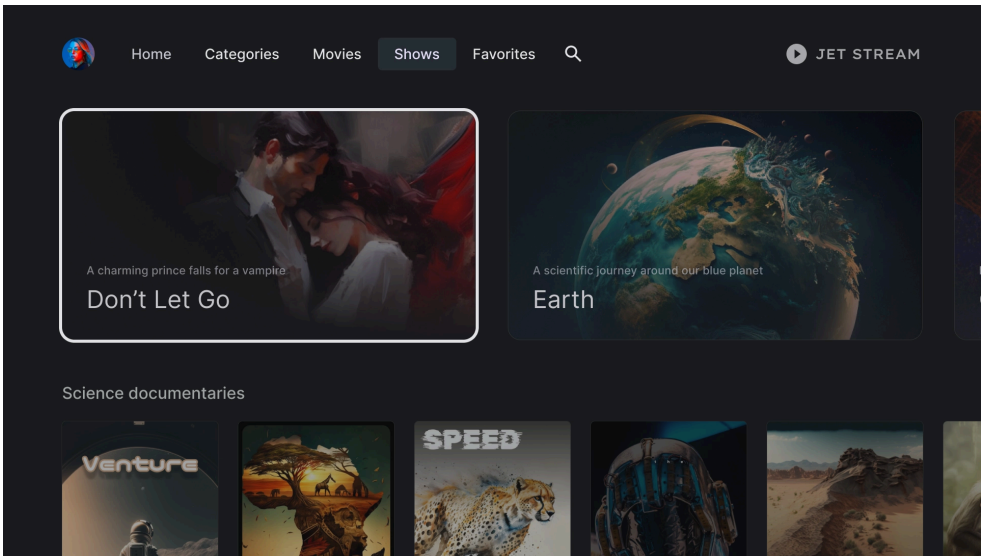
Media

Movies

A standard movies tab with a 16:9 featured cards on the top with content grid on the bottom.



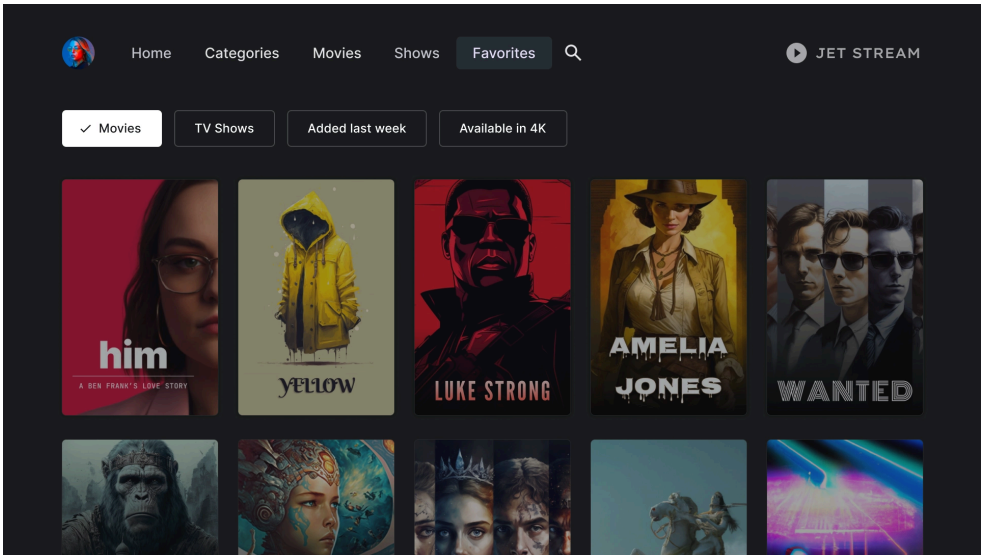
Shows



Library

Favorites

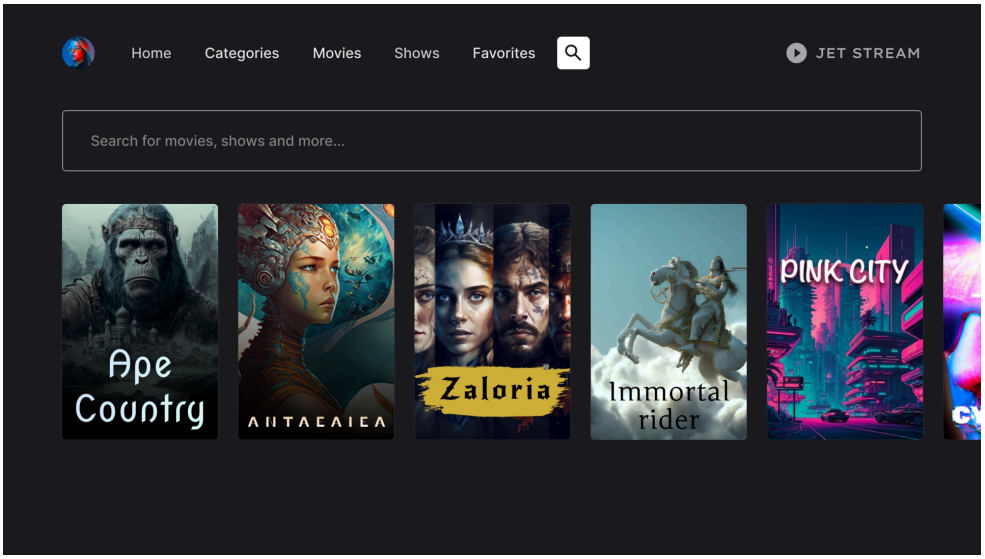
The Favorites tab includes filter chips at the top of the screen to allow for quick content searching.



Search

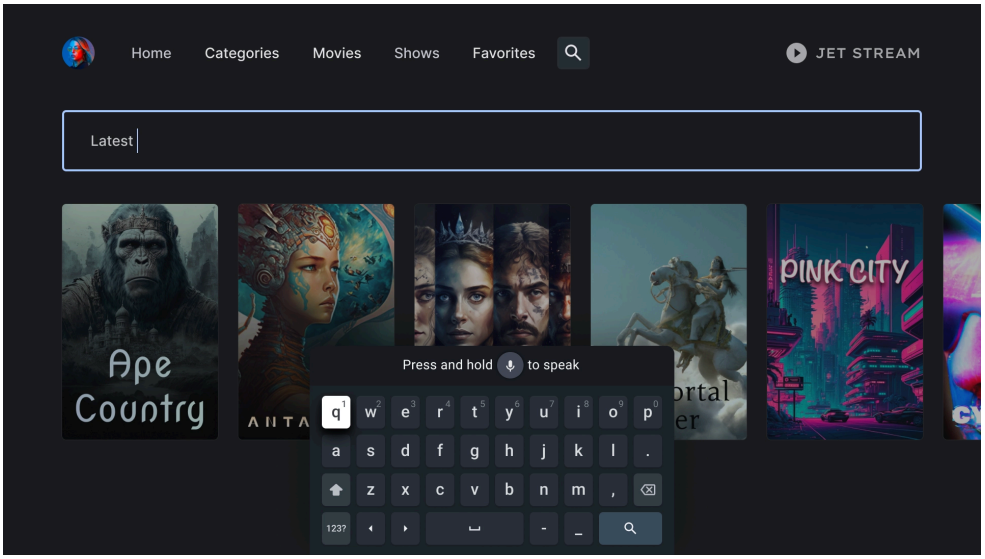
Search landing

A search page features a search bar with suggested search queries based on recent searches.



Active search

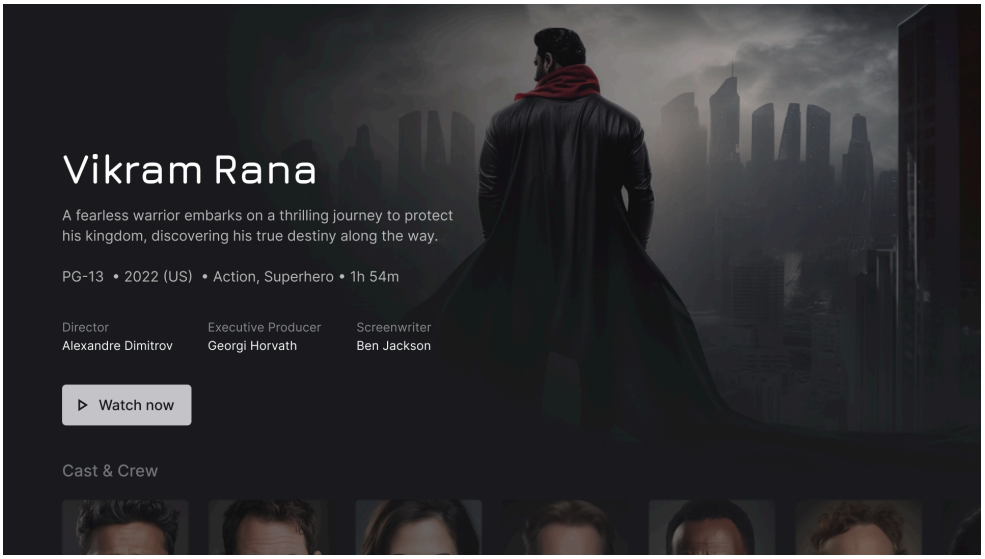
When the user focuses on the search bar, the keyboard pops up, and the results below dynamically update as the user types.



Entity details

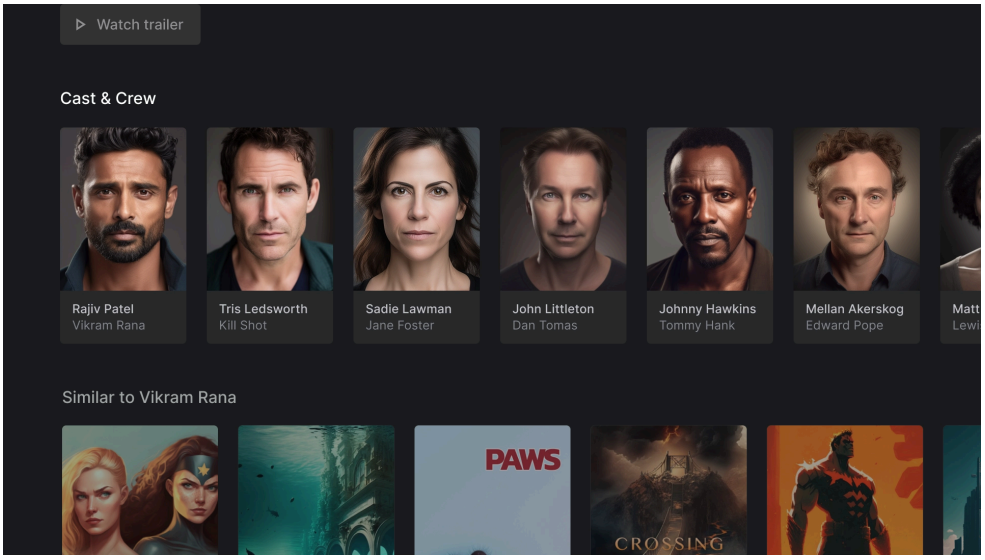
Details landing

The details page presents a cinematic view with a brief plot summary and a prominent call-to-action button to watch the movie.



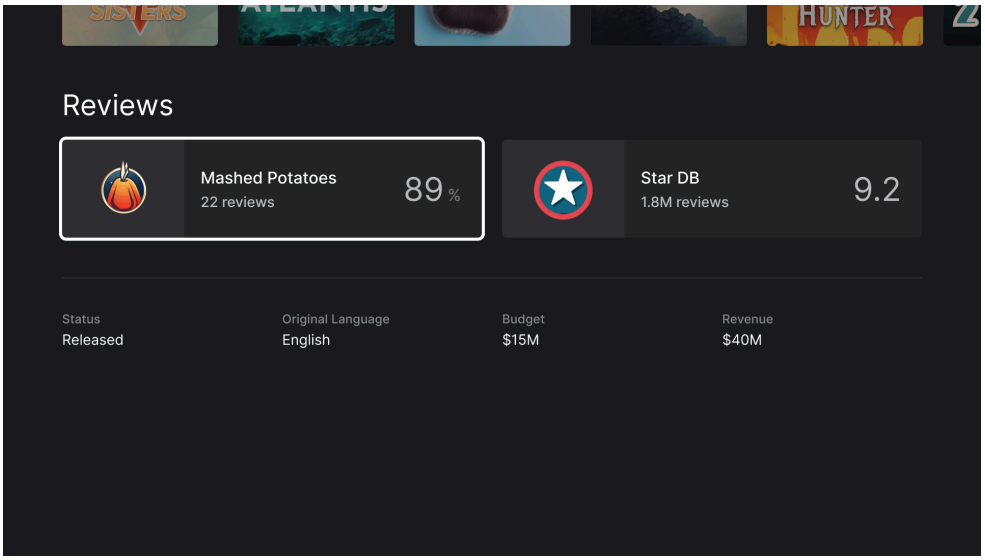
Cast and crew

The Cast and Crew section features a row of classic cards with titles and descriptions, each accompanied by a 2:3 image asset.



Ratings

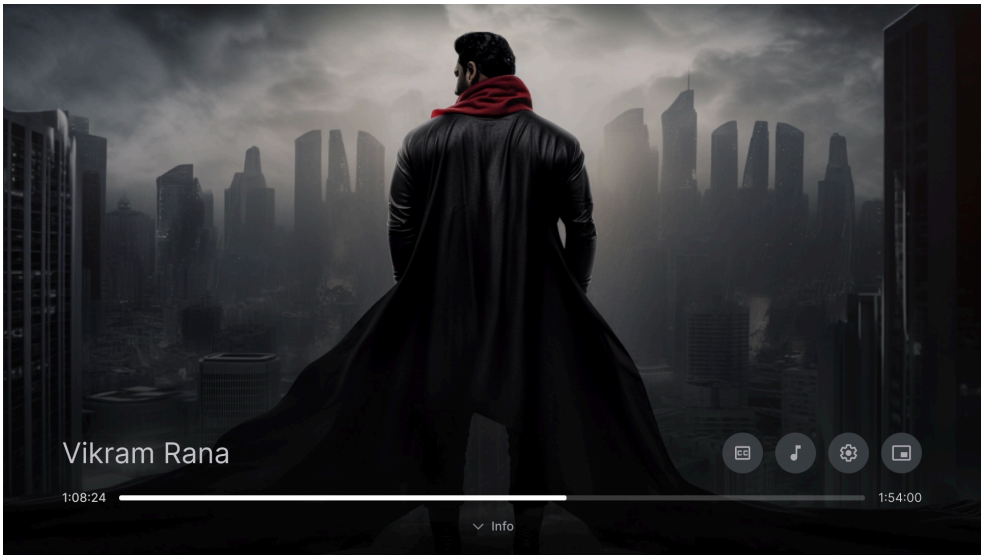
The ratings section features a custom classic wide card that includes additional information.



Playback

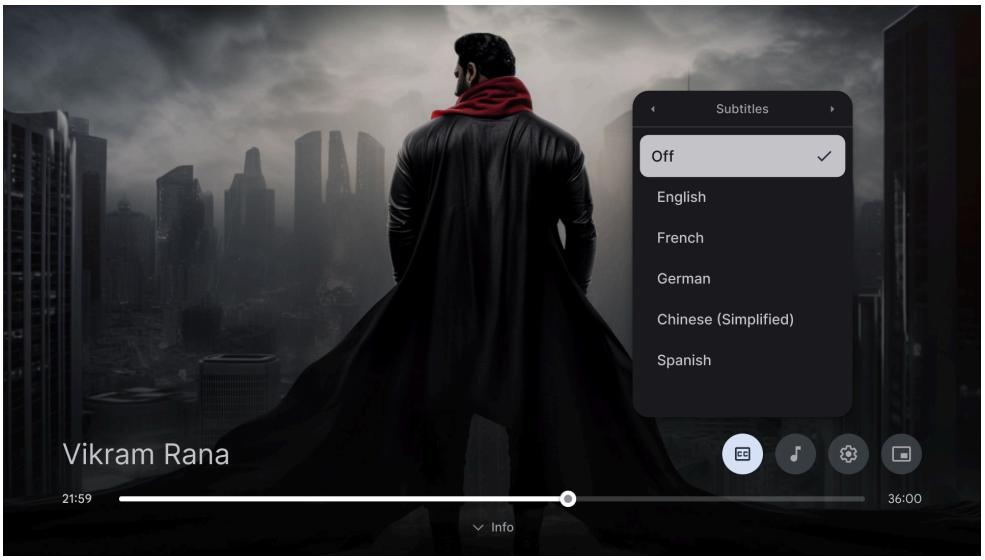
Video player

A standard video player with best practices.



Video player settings

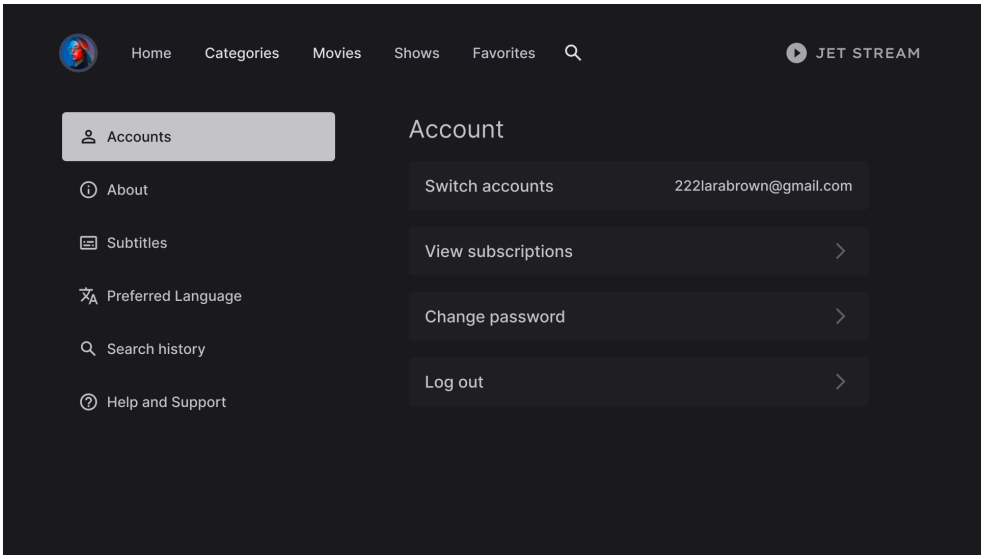
A close caption popover on the video player.



Settings

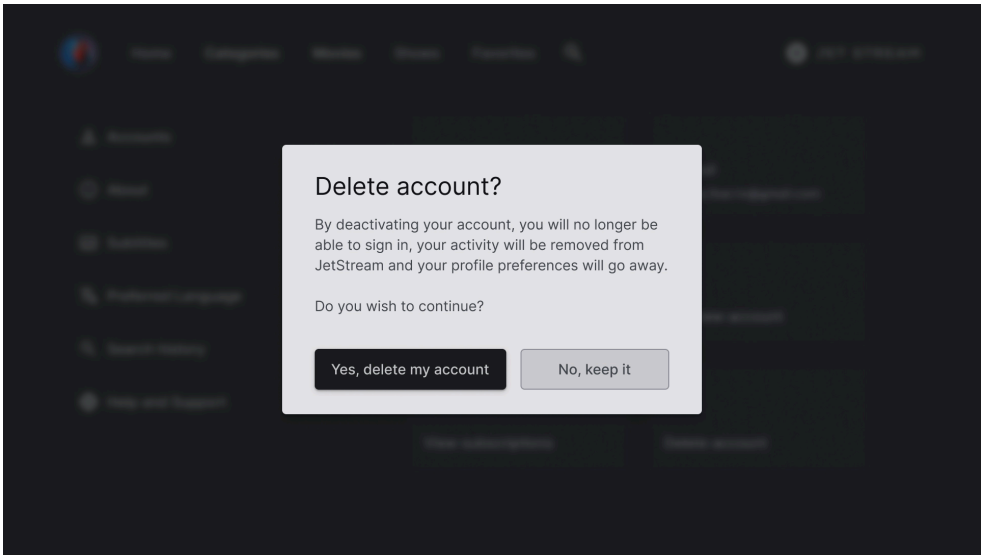
Account settings

The accounts page layout features a two-column design with a list component on the left and custom card components on the right, arranged in a grid format.



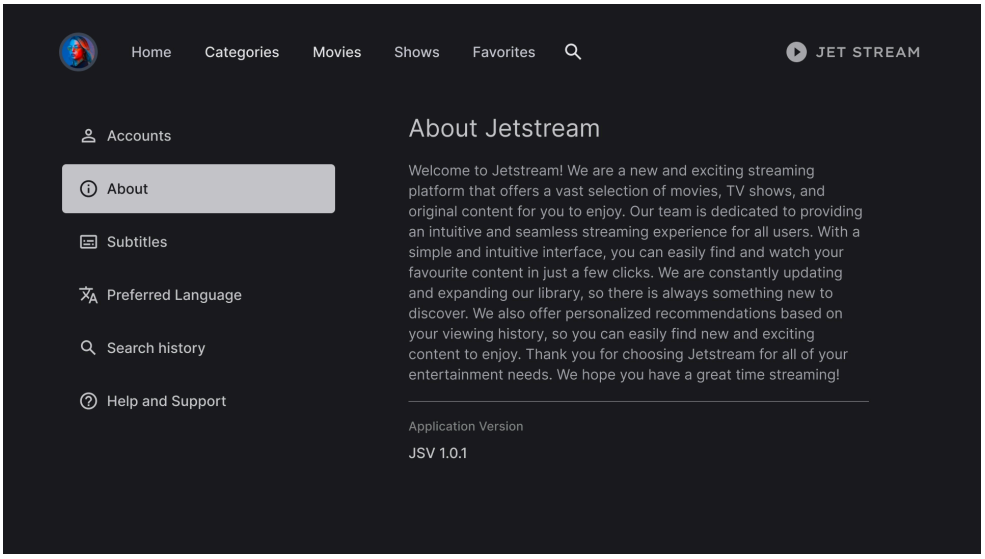
Delete account dialog

The dialog box is designed with a contrasting background to make it stand out from the rest of the screen. The two buttons in the dialog are aligned to the left for a clean and organized look.



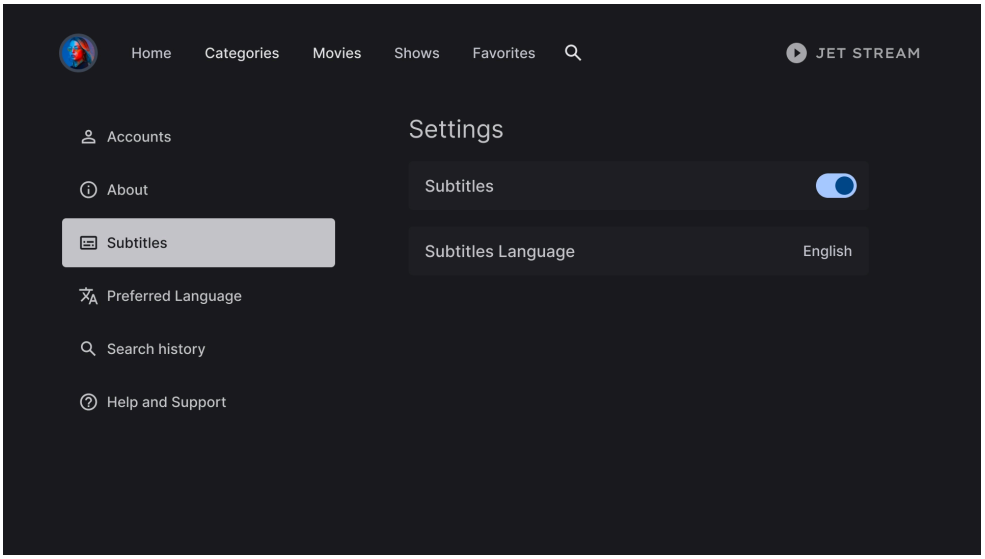
About

The About section features a right-hand panel with a scrollable text view.



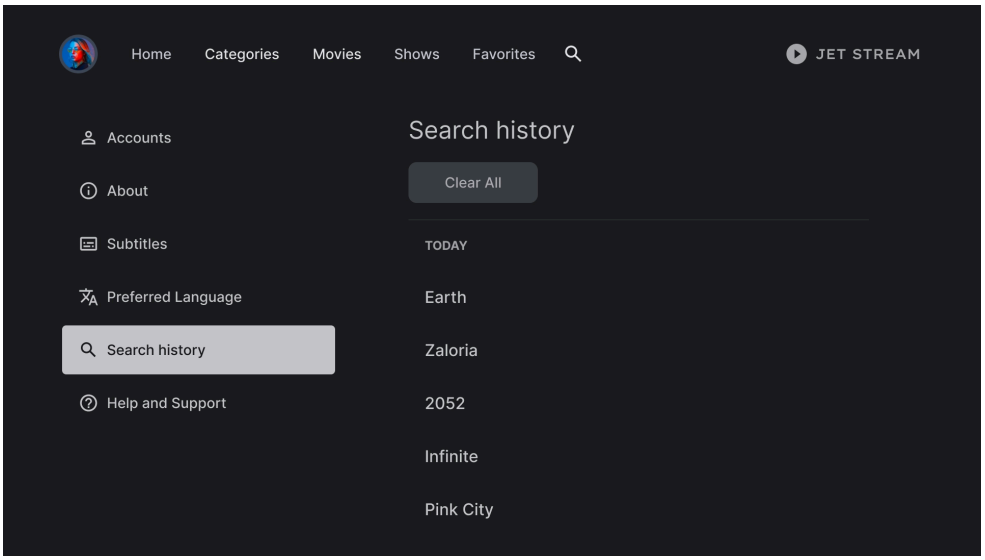
Subtitle settings

A list component is used to display various settings under subtitle, and uses actions such as a switch or a label.



History

The search history uses a layout that displays a list of previously searched queries, along with an option to clear all the search history.



Help

The Help and Support section uses a custom list component to display various options, including contact information and FAQs.
